

# Getting Started with Ward Transport & Logistics APIs

To use our APIs, you will need to get a user ID and password from our web site. If you already have one from using our site, that will work for APIs also.

To get a user ID and set a password, go to:

<https://wardtlctools.com> and click the Register New Account link at the top of the page.

<https://wardtlctools.com/wardtrucking/>

## Tools Menu

If the server you are calling our APIs from is outside North America, you need to give us your IP address so we can allow it through our firewall. To give us that, use the API Access Request Form on the right side of the API Access Request Page.

<https://wardtlctools.com/wardtrucking/apirequest/create>

A screenshot of a web form titled 'API Access Request - Non-USA'. The form is set against a light beige background. Below the title is the section header 'Servers'. A note states 'Fields with \* are required.' There are two input fields: 'Email Address \*' and 'IP Address or Range \*'. The 'Email Address \*' field has a red eye icon on the right side, indicating it is a password field. Below the input fields is a green button labeled 'Submit Request'.

Detailed API documentation is also provided on the API Access Request page. Each API is documented on this page and has the XML request/response documents defined as well as the URI to call.
